<b>ACKNOWLEDGMENTS .....</b>	<b>ii</b>
<b>PREFACE .....</b>	<b>iii</b>
<b>EXECUTIVE SUMMARY .....</b>	<b>v</b>
<b>TABLE OF CONTENTS .....</b>	<b>xi</b>
<b>1.0 PRODUCTION MILLER-CYCLE NATURAL GAS ENGINE .....</b>	<b>1</b>
<b>1.1 DEVELOPMENT OF A MILLER-CYCLE ENGINE FOR A NATURAL GAS COGENERATION UNIT [Tsukida et al.] .....</b>	<b>2</b>
1.1.1 Production Development .....	3
1.1.2 Production Miller-Cycle Engine Development .....	6
1.1.3 Cogeneration Package .....	8
<b>2.0 MEDIUM-DUTY NATURAL GAS TRUCK ENGINE .....</b>	<b>11</b>
<b>2.1 HINO'S LOW-EMISSION, CNG ENGINE-POWERED TRUCK [Murakami et al.] .....</b>	<b>12</b>
2.1.1 Engine Features .....	12
2.1.2 Engine Performance and Exhaust Emissions .....	12
2.1.3 Reliability .....	15
2.1.4 Vehicle Performance .....	15
<b>3.0 COMPRESSION-IGNITION OF PREMIX NATURAL GAS.....</b>	<b>17</b>
<b>3.1 EXPERIMENTAL INVESTIGATION OF PREMIX COMPRESSION IGNITION OF NATURAL GAS MIXTURE [Kawabata et al.] .....</b>	<b>18</b>
3.1.1 Experimental Apparatus and Procedure .....	18
3.1.2 Self-Ignition Characteristics .....	18
3.1.3 Engine Performance and Operating Range.....	19
3.1.4 Combustion Characteristics .....	21
3.1.5 Exhaust Emissions .....	22

**TABLE OF CONTENTS**  
(cont'd.)

	<u>Page</u>
<b>4.0 EVALUATION TECHNIQUE FOR VALVE-SEAT WEAR AND LOW-POLLUTION VALVE SEAT</b> .....	<b>25</b>
<b>4.1 EVALUATION METHOD FOR VALVE AND SEAT INSERT WEAR [Maki et al.]</b> .....	<b>27</b>
4.1.1 Valve and Seat Wear in Gasoline and LPG Engines .....	27
4.1.2 Parametric Test.....	28
<b>4.2 HIGH-PERFORMANCE, LEAD-FREE EXHAUST VALVE SEAT [Ehira et al.]</b> .....	<b>30</b>
4.2.1 Base Matrix Metal Development .....	31
4.2.2 Additives for Improved Machine-ability .....	33
4.2.3 Wear Resistance Evaluation through Engine Durability Test.....	36
<b>5.0 PREMIX HYDROGEN ENGINE EFFICIENCY AND HYBRID VEHICLE APPLICATION</b> .....	<b>39</b>
<b>5.1 THERMAL EFFICIENCY OF A PREMIX HYDROGEN ENGINE [Shudo et al.]</b> .....	<b>40</b>
5.1.1 Comparison of Overall Efficiency of a Hydrogen Engine with a Methane Engine .....	40
5.1.2 Excess Air Ratio and Volumetric Efficiency.....	43
5.1.3 Heat Transfer to the Walls .....	43
<b>5.2 HYDROGEN ENGINE FOR A SERIES HYBRID ELECTRIC VEHICLE [Nakajima et al.]</b> .....	<b>45</b>
5.2.1 Exhaust Emissions and Indicated Thermal Efficiency .....	45
5.2.2 Mechanical Efficiency .....	51
5.2.3 Engine Power.....	53
<b>6.0 TRANSAXLE DEVELOPED FOR A HYBRID ELECTRIC VEHICLE</b> .....	<b>57</b>
<b>6.1 TRANSAXLE SYSTEM AND OPERATION [Matsui et al. and Ohshima et al.]</b> .....	<b>58</b>
6.1.1 Transaxle System.....	58
6.1.2 Transaxle Operation .....	60

**TABLE OF CONTENTS**  
(cont'd.)

	<u>Page</u>
<b>6.2 DEVELOPMENT OF COMFORTABLE AND RELIABLE HYBRID-VEHICLE DRIVING PERFORMANCE [Matsui et al. and Ohshima et al.].....</b>	<b>62</b>
6.2.1 A Method to Reduce Vibration at Engine Start .....	62
6.2.2 Vehicle Power Characteristics.....	64
<b>7.0 THE CAPACITOR-TYPE BATTERY AND ENERGY RECOVERY .....</b>	<b>67</b>
<b>7.1 FEASIBILITY STUDY OF CAPACITOR FOR ENERGY STORAGE IN AN EV AND HEV [Ikeda et al.].....</b>	<b>68</b>
7.1.1 Simulation Conditions .....	68
7.1.2 Parametric Analysis.....	69
<b>7.2 ENERGY RECOVERY BY A CAPACITOR-TYPE BATTERY FOR AN EV [Hayashida et al.] .....</b>	<b>73</b>
7.2.1 Prediction of Energy Recovery under City Driving Conditions.....	73
7.2.2 Increased Energy Recovery Capability by Adding a Capacitor.....	76
7.2.3 Energy Recovery with Both Capacitor and Battery Under City Driving Conditions.....	78
7.2.4 Recycling the Recovered Energy .....	79
